

R & D MARINE

Split Couplings, Adapters & Bobbins

Provides a better fit than a solid coupling

Can accommodate the variations that occur with normal shaft tolerances by clamping onto shaft.

Greater strength and reliability

Machined from solid steel.

Bobbins

Bobbins extend the shaft when necessary.

Easy to install and position

Split couplings are much easier to remove than solid couplings. Save time and money!

Adapters

Adapters are available for most gearboxes to allow the fitting of a Flexible Coupling.

(800) 523-7558

P - Pilot Drilled Open Tolerance

B - Bored Only

BK - Bored & Keyed

Recommended tightening torque:

M10 - 61 Nm 45 lbsft

7/16 UNF - 81 Nm 60 lbsft

1/2 UNF - 100 Nm 75 lbsft

5/8 UNF - 210 Nm 155 lbsft

Gearbox Output Flange Adaptors

R&D Marine can provide an adaptor for most gearboxes to allow the fitting of a flexible coupling from their extensive range. If the gearbox fitting you require is not listed please contact PYI Inc.

Flange machined to suit the gearbox output flange. The register could be male or female (see listing below).

Flange machined to fit the selected R&D Flexible Coupling. The register could be male or female.
